

FL TECHNICS RECEIVES EASA PART 145 CERTIFICATE FOR SUKHOI SUPERJET 100-95

News / Maintenance / Trainings

[FL Technics](#), a global provider of one-stop-shop aircraft maintenance, repair and overhaul services, is delighted to announce the extension of its EASA Part 145 certificate by adding [Sukhoi Superjet 100-95](#) aircraft type to its capabilities.

From the 31st of August, 2015 onwards, FL Technics engineers are ready to offer both scheduled and unscheduled checks, defect rectification, minor component replacement and other line maintenance works on SSJ100 airplanes.

Also, the newly received certificate means that FL Technics will now provide 24/7 [AOG support for SSJ100](#) operators throughout its Line Maintenance network in Europe and Asia.

“Mexico, Belgium, Italy, Russia, China, Kazakhstan, Thailand, Vietnam, Indonesia and others – this is the geography of SSJ100’s current and upcoming operations. Being a technologically advanced aircraft, step-by-step SSJ100 is growing in popularity and trust amongst international airlines. However, any airplane is not just a flying machine. It’s an integrated product which also comprises a pool of qualified pilots and engineers, a wide technical support and training network, flexible finance, etc.,” explains Zilvinas Lapinskas, the CEO of FL Technics.

“We are glad to be able to contribute to the development of SSJ100’s aftermarket support. In

addition to line maintenance, we are planning to add base maintenance, engineering and technical training services for SSJ100 operators. With our own MRO centres in Lithuania and Indonesia as well as almost 30 line stations across the globe, we are ready to offer airlines our support for both commercial and VIP versions of SSJ100,” adds the CEO of FL Technics.
