

FLIGHTSAFETY INTERNATIONAL GOT EASA AND UK CAA CERTIFICATION FOR GULFSTREAM G700 FFS AT FARNBOROUGH LEARNING CENTRE

News / Business aviation, Maintenance / Trainings

FlightSafety International received European Union Aviation Safety Agency and UK Civil Aviation Authority certification for its Gulfstream G700 Full Flight Simulator , located at the company’s Farnborough Learning Centre. The certification of the simulator, which was engineered and manufactured by FSI, validates the advanced technology, accuracy, and fidelity of the flight training device, confirming it meets the highest European and UK regulatory standards. The FFS will be leveraged for initial, recurrent, and advanced pilot training to support G700 and Gulfstream G800 aircraft, further expanding global access to high-fidelity training.

David Mann, Farnborough Centre Manager, FlightSafety International commented: “The G700 simulator certification in Farnborough reinforces FSI’s long-standing commitment to supporting

Gulfstream operators across Europe. It expands access to advanced training in the region, giving pilots more access to realistic, world-class training that meets the highest regulatory standards.”

FSI has operated in Europe for nearly 50 years, with Farnborough serving as one of its flagship learning centres in the region. The Farnborough facility supports a broad range of business aviation customers and continues to expand its capabilities to meet growing demand from European and international operators. The new certification follows FSI’s announcement of its planned [expansion at the Farnborough Learning Centre](#), further strengthening the company’s long-term investment in training reach in the region.
