

FRENCH SCHOOL TRIMAILLE AERO FORMATION SELECTS ALSIM FOR THIRD TIME AND BUYS 2 NEW ALX & AL250 SIMULATORS

News / Maintenance / Trainings

Alsim is pleased to announce the sale of an [AL250](#) and an [ALX](#) (Multi Engine Piston and Medium Jet) to French flight school [Trimaille Aero Formation](#), located in Toussus-le-Noble, next to Paris. Trimaille Aero Formation trusted Alsim from the beginning, and did not hesitate to reiterate their confidence several times: before their latest acquisition of two new simulators, they made their initial purchase in 2000, followed by another in 2011. Trimaille Aero Formation benefited from the Alsim *buyback* campaign, which allows schools to replace their old device with a new one offering the latest technology.

The increase of activity at Trimaille Aero Formation lead to these acquisitions; the AL250 will be used for CPL and especially for IR training thanks to its capacity to effect 2D, 3D and PBN approaches, while the generic A320 Medium Jet configured ALX will ensure JOC and MCC Advanced training.

Mr Jean-Pierre Trimaille, Director and Instructor at Trimaille Aero Formation, explains the reasons

for their choice: «we chose Alsim again because we've been using their devices for so many years; we know their quality. Another important factor for us: we wanted to meet the coming regulatory criteria, with LPV-certified simulators. Alsim was able to answer our specific needs, along with Advanced MCC. With Alsim, we are guaranteed our simulators will be quickly qualified, meeting our students' demand of delivering a higher level of training».

About Trimaille Aero Formation

Flight training school Trimaille Aero Formation was founded in 1985 and hundreds of pilots have been trained there since. The school, comprising of a significant fleet of aircraft and simulators, offers frozen ATPL or modular training. Apart from that, Trimaille Aero Formation proposes QC/QT on Beech 200, TBM700 and PA46T.
