

LUFTHANSA TECHNIK PHILIPPINES NEW HANGAR INCREASES CAPACITY BY UP TO 20 PERCENT

News / Maintenance / Trainings

In a festive ceremony at the airport of Manila on August Lufthansa Technik Philippines recently officially opened a new hangar which supplements the existing seven maintenance lines by an additional three lines. The parking spaces of the new hangar can be configured according to need to provide room for four narrow-body aircraft, or one wide-body aircraft and two narrow-body aircraft. Alternatively, an Airbus A380 can also be accommodated. The completion of the 9,000 square meter hangar, which was initially planned for September 2020, had been delayed due to the Corona pandemic.

Elmar Lutter, President and Chief Executive Officer of Lufthansa Technik Philippines on the occasion of the opening ceremony, commented: "This is a very special milestone for Lufthansa Technik Philippines in the 22nd year of our existence. It marks a transition from some of the most difficult times we have experienced as a company due to the pandemic to the current phase of noticeable recovery. This is concrete, tangible evidence that we see clearer skies ahead of us."

The fourth hangar in total will increase the overhaul capacities by up to 20 percent and provide work for at least an additional 275 employees. "The opening of the new hangar is Lufthansa Technik Philippines' response to the increasing demand for aircraft maintenance, as travel

continues to increase and a majority of the worldwide fleets are now back in operation. We are pleased to offer our customers first-class service and with reliable overhauls provide a valuable contribution to the stabilization of their flight operations," says Rainer Janke, Vice President for Marketing & Sales at Lufthansa Technik Philippines.
