

MRO MIDDLE EAST: REVIMA ADDS 'ON WING' TO ITS LANDING GEAR OFFER

News / Maintenance / Trainings

French-based landing gear MRO specialist Revima has made the journey to Dubai to launch its dedicated “On Wing Services” team to the Middle East.

Speaking at the MRO Middle East show which opened in Dubai this morning, Revima’s vice president for landing gear centres of excellence, Cyrille Pillet said: “As a world class service provider, it is paramount that we continuously seek excellence in customer satisfaction by offering additional value added services such as the newly extended suite of ‘on wing services’.”

The company provides AOG support, on site gear servicing, aircraft configuration check, partial disassembly for parts replacement,

In November, Revima announced a long-term agreement with UTC Aerospace Systems to provide maintenance, repair and overhaul (MRO) services for landing gear systems on Boeing 777-300ER aircraft operated by Emirates.

While under the principal management of Revima, a portion of the work scope now takes place at the Goodrich Customer Services I. maintenance, repair and overhaul campus in Dubai.

Goodrich performs initial services on the landing gear before shipping to Revima’s Caudebec-En-Caux, France, facility for the overhaul.
