

SHERWIN-WILLIAMS ANNOUNCES NEW 2016 AEROSPACE COATINGS TRAINING PROGRAM

News / Maintenance / Trainings

Sherwin-Williams announced its new 2016 aerospace coatings training program schedule to further provide today's aerospace coatings painting professionals with the continuous training required to stay current on the most up-to-date aviation coatings products and application methods available. Designed for both MRO and OEM instruction, this hands-on and classroom training includes applying new chrome hazard free primers and composite surfacer systems, to spraying the latest in technology-driven high-quality topcoats and clearcoats.

The extensive 2016 Aerospace Coatings Training Program schedule includes a series of twoday classes on:

? February 16-17

? April 19-20

? July 19-20

? September 20-21

? November 8-9

All classes will be held on-site at the Sherwin-Williams Aerospace Coatings Andover (Wichita)

Kan. training facility.

This year's training will focus on the traditional single-stage technology systems, such as the Jet Glo® and Jet Glo Express™ coatings, as well as the latest basecoat/clearcoat exterior aerospace paint system, SKYscapes®, that delivers fast processing time, excellent color and gloss retention, and easy maintenance.

Training and mastering the SKYscapes paint system will allow aviation maintenance repair facilities and their paint shops to augment production schedules and turn around more paint jobs.

Also covered in the 2016 training sessions, is a section on Sherwin-Williams JetFlex®, JetFlex® WR and new JetFlex ELITE™ aircraft cabin coatings. Known for their outstanding stain resistance, JetFlex coatings are available as an intermix system for both semi-gloss and flat finishes.

During the two-day session all participants will learn about the latest industry developments and products in the following areas:

? Surface Pretreatment

? Primer Systems

? Top Coats

o Jet Glo Express™ polyester urethane

o Jet Glo® polyester urethane

o Acry Glo® and Acry Glo® HS acrylic urethane

o JetFlex® polyurethane enamel (interior coating)

o SKYscapes® polyester urethane basecoat/clearcoat

o SKYscapes® General Aviation acrylic polyester basecoat/clearcoat

“New technicians can become better acquainted with our products and the best aerospace coatings application techniques, while seasoned professionals can take time to refine their skills in an actual shop setting,” says Julie Voisin, Sherwin-Williams Global Product Manager for Aerospace Coatings. “Our two-day training programs are designed for all levels of paint shop personnel. Our goal is to have every participant leave with inspiration and ideas to help them create the best paint jobs possible back at their own shops, on every plane, every time.”

All training sessions will be held from 8:30 a.m. to 4:30 p.m. daily. A per-person registration fee of \$349 includes classroom and hands-on training with skilled industry professionals, training book and related materials, all necessary safety equipment, catered lunch each day, and training certificate. The training center is equipped with many types of spray equipment, including electrostatic guns. Attendees may bring their own spray equipment if they prefer.
