

SMART AVIATION IN POLAND ADDS THE BRAND-NEW ALSIM AL2006 SIMULATOR TO ITS FLEET, A REPLICA OF THE TECNAM P2006T NG

News / Maintenance / Trainings

Smart Aviation in Poland has selected the brand-new AL2006 simulator, a high-fidelity replica of the Tecnam®P2006T NG. The agreement was signed during EATS in Portugal, marking an important step in Smart Aviation's commitment to delivering advanced and realistic flight training. [The AL2006](#) faithfully reproduces the Tecnam P2006T NG, a highly regarded, cost-efficient multi-engine trainer. Designed to FTD Level 5 and EASA FNPT II standards, offering a full-size flight deck replica, a semi-enclosed instructor station, active control loading, and a specific flight model based on aircraft flight characteristics.

For maximum realism, the AL2006 is equipped with an immersive visual system featuring three high-definition laser projectors, enhanced by a vibration cueing system, and delivering an impressive 210° x 50° field of view. It also includes the original Garmin G1000 NXi and GFC 700 autopilot, ensuring an authentic experience that closely replicates the real aircraft's cockpit environment — a world first for a P2006T NG simulator.

Mateusz Działyński, CEO and Head of Training at Smart Aviation commented: “Our philosophy has always been to provide training that truly prepares our students for airline operations. From the very beginning, Smart Aviation has consistently invested in new aircraft and modern simulation technologies — and this time is no different. Alongside the purchase of the new ALSIM AL2006 simulator, we have also ordered three brand-new Tecnam P2006T NG aircraft, which will replace the previous generation model in our fleet. The new simulator, designed as a faithful replica of the latest Tecnam P2006T NG, will enable our students to learn SOPs more effectively and ensure a smooth transition from simulator to aircraft, significantly enhancing overall training efficiency.”

Anna Lezoray, Sales Manager at ALSIM stated: “We are very proud to once again count Smart Aviation between our customers who continue their confidence in ALSIM devices over the years by adding this third ALSIM trainer to their fleet. By introducing the AL2006 flight simulator to ALSIM's range of products we address market need for high fidelity, reliable trainers fulfilling changing aviation regulations, especially in the light of competency-based training philosophy.”
