

THALES REALITY H SIMULATOR TO EQUIP NEW ATLANTIC AIRWAYS TRAINING CENTRE IN THE FAROE ISLANDS

News / Maintenance / Trainings, Manufacturer

Atlantic Airways and Thales have signed a contract for one AW139 Reality H Level D Full Flight Simulator. Located in the North Atlantic between Iceland and Norway, the Faroe Islands will be a hub for advanced AW 139 training, supporting safer helicopter operations worldwide. The Thales Reality H Level D Full Flight Simulator, which is one of the world's most advanced commercial helicopter simulators, will be used to provide scenario-based flight and mission training to Atlantic Airways helicopter crewmembers and AW139 helicopter operators worldwide.

With this simulator, Atlantic Airways Aviation Academy will deliver state-of-the-art training, including initial type rating, recurrent training and proficiency checks for both VFR and IFR. This simulator will enable pilots to achieve the certification needed to fly the AW139 under EASA approval. This AW139 helicopter simulator addresses a growing training need in Europe and further afield. Offshore and onshore operations covered include complex

Search and Rescue missions as well as public transport and VIP operations to unprepared landing sites.

Customisation of the simulator for the specific environment of the Faroe Islands through an immersive and highly realistic visual system will offer exceptional operational training capabilities to handle a multitude of system failures and overcome very complex malfunctions should they arise in the real world. Pilots can thus train safely in high-risk mission scenarios in a wide range of harsh weather conditions, and the proficiency of the complete crew can be tested thanks to the winch trainer coupled with the full flight simulator.

Atlantic Airways is a well-established airline and an Approved Training Organisation. A significant source of revenue is charter and Aircraft, Crew, Maintenance and Insurance, which accounts for more than half of the revenue generated outside of the Faroe Islands. The Atlantic Airways helicopter department provides a regular service between the islands of to the Faroese islands, SAR activities and offshore transportation in the North Atlantic.

Niels Mortensen, chairman of the board for Atlantic Airways, commented: "I am delighted about this giant leap forward the new simulator means for the Faroese aviation industry, and I look forward to it becoming a reality. In addition to advancing the Faroese aviation industry, this is a new and solid commercial branch for Atlantic Airways to rely on. We are proud and grateful for the cooperation with Thales Group and look forward to the exciting development of the Atlantic Airways Aviation Academy"

Peter Hitchcock,VP Training & Simulation, Thales, said: "We are particularly honoured that Atlantic Airways has selected our state-of-the-art Reality H full flight simulator and excited to launch this new cooperation with the airline. We are committed to supporting Atlantic Airways for the long term to deliver first-class training services for AW139 crews to improve flight safety standards worldwide."
