

AIRBUS STATEMENT: METROJET A321-200 FLIGHT 7K-9268 ACCIDENT OVER SINAI PENINSULA

News / Manufacturer

Airbus regrets to confirm that an A321-200 operated by Metrojet was involved in an accident shortly after 6:17 local time (04:17 GMT) over the Sinai Peninsula today. The aircraft was operating a scheduled service, Flight 7K-9268 from Sharm el Sheikh (Egypt) to St. Petersburg (Russia).

The concerns and sympathy of the Airbus employees go to all those affected by this tragic accident of Flight 7K-9268.

The aircraft involved in the accident, registered under EI-ETJ was MSN (Manufacturer Serial Number) 663, was produced in 1997 and since 2012 operated by Metrojet. The aircraft had accumulated some 56000 flight hours in nearly 21000 flights. It was powered by IAE-V2500 engines. At this time no further factual information is available.

In line with ICAO annex 13, an Airbus go-team of technical advisors stands-by ready to provide full technical assistance to French Investigation Agency -- BEA -- and to the Authorities in charge of

the investigation.

The A321-200 is the largest member of the Airbus twin-engine A320 Family seating up to 240 passengers. The first A321 entered service in January 1994. By the end of September 2015, some 6500 A320 Family aircraft were in service with over 300 operators. To date, the entire fleet has accumulated some 168 million flight hours in some 92.5 million flights.

Airbus will make further factual information available as soon as the details have been confirmed and cleared by the authorities for release.

31 OCTOBER 2015
