

ARCHER IS SET TO DEBUT MIDNIGHT ELECTRIC AIR TAXI DUBAI AIRSHOW

News / Manufacturer

Archer Aviation Midnight aircraft will make its Middle Eastern debut at the Dubai Airshow as the featured aircraft in the Advanced Air Mobility Pavilion. Middle Eastern debut of Midnight at the Dubai Airshow will give a wide array of key regional stakeholders from the Royal Family to the UAE' General Civil Aviation Authority and beyond the opportunity to experience sitting in an electric air taxi, providing an unprecedented glimpse at the future of urban air mobility in the UAE from one of the global leaders in the industry.

Recently, Archer and the Abu Dhabi Investment Office announced plans to make the UAE its first international launch partner, with plans to commence air taxi operations in both Abu Dhabi and Dubai in 2026. In addition, Archer is working with global manufacturing partner Stellantis and regional partners Falcon Aviation and GAL-AMMROC to build out aircraft manufacturing capabilities to service regional demands in the UAE and surrounding areas.

Archer' goal is to transform urban travel, replacing 60–90-minute commutes by car with estimated 10-20 minute electric air taxi flights that are safe, sustainable, low noise, and cost-competitive with

ground transportation. Archer's Midnight is a piloted, four-passenger aircraft designed to perform rapid back-to-back flights with minimal charge time between flights.
