

ASIANA AIRLINES TAKES DELIVERY OF ITS FIRST A350 XWB

News / Airlines, Manufacturer

Asiana Airlines of South Korea has taken delivery of its first A350-900, becoming the 12th airline to operate the world's newest and most efficient twin engine widebody airliner.

Asiana's A350-900 is configured with a three class layout with a total of 311 seats, comprising 28 in Business Smartium, convertible to fully flat beds, 36 in Economy Smartium and 247 in the main cabin.

Altogether Asiana has ordered 30 A350s and will initially operate the aircraft on flights within Asia. From the third quarter of 2017, the carrier will deploy the aircraft on premier long haul routes to Europe and the US, beginning with services from Seoul to London and San Francisco.

The A350 XWB features the latest aerodynamic design, carbon fiber fuselage and wings, plus new fuel-efficient Rolls-Royce engines. Together, these latest technologies translate into unrivalled levels of operational efficiency, with a 25 per cent reduction in fuel burn and emissions, and

significantly lower maintenance costs. The spaciousness, quietness, beautiful interior and mood lighting in the cabin contribute to superior levels of comfort and well-being, setting new standards in terms of flight experience for all passengers.

To date, Airbus has recorded a total of 821 firm orders for the A350 XWB from 44 customers worldwide, already making it one of the most successful widebody aircraft ever.
