

AURA AERO LAUNCHES ITS FIRST EUROPEAN CROWDFUNDING CAMPAIGN

News / Finance, Manufacturer

AURA AERO is launching its first European crowdfunding campaign, via Crowdcube, in parallel with its main fundraising. This possibility to invest, even if modestly, is open to all, and will enable French and European subscribers to support the development of the company, while giving AURA AERO the opportunity to not only raise new funds, but also rally a community around its collective and human adventure.

This campaign will be in addition to the support which the company has received since its inception, from private shareholders and bondholders as well as the French State, the Occitanie Region, the BPI (French Public Investment Bank) and venture capital firm Innovacom. Thanks to this support, AURA AERO has already raised 70M € in the past five years.

Since its launch in 2018, the aircraft manufacturer has passed many steps and industrial milestones, and almost 250 collaborators are taking part in this success today:

INTEGRAL program:

? **Two aircraft (INTEGRAL R and INTEGRAL S) are already flying** and their certification, as well as the first deliveries, are expected this year;

? **The first flight of the 3rd aircraft, INTEGRAL E (electric two-seater), will take place** in the upcoming days;

ERA program:

? The program has passed MG4 in the first quarter of this year, **validating the different architectural choices for materials and systems**. Therefore, ERA has entered its detailed design phase, with commitments from the main industrial partners;

? AURA AERO has received **decisive support from EASA**, with the signature of a "Pre Application Contract" aimed at preparing ahead of time the future frame for the aircraft's certification;

? The manufacturer has also signed a **cooperation agreement with Airbus Protect**, the Airbus subsidiary specializing in risk management, in view of the aircraft's certification;

? Interest in ERA is still strong, with **letters of intent for a total of almost 500 aircraft, an order book valued at almost 8 Bn \$** ;

Company:

? The company will **generate its first revenues** as soon as INTEGRAL R receives certification, leading to the first deliveries, by the end of this year;

? The manufacturer has received **PART 21G (production) and PART 21J (industrial design) agreements**.

PRESS RELEASE

Toulouse-Francal airport, 13 June 2024

Je?re?my Caussade, CEO of AURA AERO, says:*Because everyone can contribute to the decarbonization of air transport, AURA AERO gives the possibility to each to subscribe to this crowdfunding campaign, according to their means. We are convinced that any support, whatever it may be, can make a difference and enable us to take a new step in our development*

. And because every little helps, let's create, all together, tomorrow's low-carbon aviation! ».
