

BERINGER AERO: 40 YEARS OF INNOVATION, PASSION AND AVIATION EXCELLENCE

News / Manufacturer

BERINGER AERO team gathered to celebrate the company's 40th anniversary with a memorable event at their headquarters. Over 200 guests — including aircraft manufacturers, dealers, pilots, team members, and friends from across the globe — gathered to pay tribute to four decades of innovation, dedication, and a shared passion for aviation.

Throughout the year, **BERINGER** also seized the opportunity to celebrate this significant milestone at key events, including Aero Friedrichshafen and EAA AirVenture. These occasions provided an opportunity to commemorate this significant milestone with as many customers and partners as possible.

Claire Beringer, CEO of **BERINGER AERO** said: "What we're celebrating is not just our story, but the story of everyone who helped write it. Innovation has always been at the heart of everything we do — not just for performance, but for safety."

The event began with guided tours of BERINGER's facilities, showcasing the company's fascinating history and a behind the scenes look at how their products are made. Following the tours, participants indulged in a delightful array of local cuisine, beverages, and live music, culminating in an exhilarating aerobatic demonstration by Mikaël Brageot, an accomplished aerobatic pilot known for competing in the Red Bull Air Race. He made history as the youngest pilot to represent the French national aerobatic team and has achieved victory in European championships.

With the rise of electric aviation, heavy UAVs, and eVTOL aircraft, BERINGER AERO is ready for a new era. The recent launch of its official web shop and expanded service offerings underline a clear vision: to remain at the forefront of aviation safety and innovation.
