

BOMBARDIER CELEBRATES 15-YEARS OF ITS QUERÉTARO SITE AS IT DELIVERS THE 100TH GLOBAL 7500 AIRCRAFT REAR FUSELAGE

News / Business aviation, Manufacturer

Bombardier celebrates the 15-year anniversary of its world-class manufacturing operations in Querétaro, Mexico. The achievement is further highlighted by the site's recent completion of the 100th rear fuselage for the industry flagship *Global 7500* business jet, underscoring the talent and skill of its dedicated employees.

Since establishing a manufacturing facility in Mexico in 2006, Bombardier has demonstrated its commitment to the country, helping develop and grow its aerospace industry. Today, Mexico's reputable aerospace cluster makes it an important player on an international scale. Bombardier's state-of-the-art facility in Querétaro employs highly skilled teams to manufacture key structural components for the company's leading business jets, including the rear fuselage for all *Global* aircraft. This important mandate is a source of great pride for the talented local workforce.

“We are very proud to commemorate this important anniversary. Bombardier has played a significant role in the development and growth of Mexico’s aerospace industry,” said Paul Sislian, Executive Vice President, Operations and Operational Excellence, Bombardier. “I would like to thank our teams in Querétaro for all they’ve accomplished in the last 15 years. It’s through their hard work, commitment, and ingenuity that they have contributed to building the world’s leading business jets.”

Bombardier is sharing this celebration with various organizations that have supported the aerospace industry in Mexico, including: the Aeronautical University in Querétaro (UNAQ), the Mexican Federation of Aerospace Industries (FEMIA) and the Aerocluster Querétaro (ACQ).

Beyond the company’s pledge to the aerospace industry in Mexico, Bombardier and its Querétaro employees are also very committed to the local community. Among its social initiatives, the company has a long-standing alliance with the Sierra Gorda World Biosphere Reserve, one of Mexico’s most important protected natural environments, through the responsible use of natural resources and the support of specific projects impacting the environment globally and locally. Bombardier also funds social projects implemented by an employee-led group called the Causa Querétaro.

At the heart of Bombardier’s site in Mexico are the approximately 1,200 highly skilled and dedicated employees who play a key role in the manufacture of world-class aircraft components and complex systems for Bombardier’s *Challenger* and *Global* business jets, including the rear fuselage for the *Global 7500* aircraft. With the completion of another major structure for the 100th *Global 7500* business jet, the Querétaro site is contributing to the progression of the program’s learning curve.

The completion of the 100th *Global 7500* aircraft rear fuselage follows [the 100th manufacture of the *Global 7500* aircraft wing](#) and [the 50th *Global 7500* business jet delivery](#) in the first quarter of 2021, outlining strong interest for the industry’s flagship business jet and its remarkable performance since entering service.
