

BOMBARDIER GLOBAL 7500 BUSINESS JET ENTRY-INTO-SERVICE

News / Business aviation, Manufacturer

Bombardier celebrated the entry-into-service of its award-winning *Global 7500* business jet, during a special event held at its recently renamed Laurent Beaudoin Completion Centre, in presence of selected customers, suppliers and representatives from the industry.

“Pride and excitement are profound understatements when it comes to the entry-into-service of our flagship *Global 7500* aircraft,” said David Coleal, President, Bombardier Business Aircraft. “This revolutionary aircraft is the gateway to a transformed business aviation landscape and a very bright future. No other aircraft can compare and this achievement demonstrates Bombardier’s commitment to deliver revolutionary and high-performing aircraft and provide customers with the best business jet experience in the world.”

Throughout the entire flight testing program, the *Global 7500* aircraft demonstrated its ability to push the boundaries of business travel by exceeding its initial performance commitments. In addition to its unsurpassed range of 7,700 nautical miles, the *Global 7500* aircraft exceeded its original takeoff and landing performance commitments, leading to a new published takeoff distance of 5,800 feet - almost 500 feet shorter than the closest – and smaller – competitor aircraft. The aircraft also reached Mach 0.995 only five months after the start of the flight test program – another unprecedented achievement in a flight test program.

“Today’s celebration is a testament to the rigour and excellence of our *Global 7500* aircraft program, from the drawing board to entry-into-service,” said Michel Ouellette, Senior Vice President, Program Management and Engineering, Bombardier Business Aircraft. “It is a historic moment for Bombardier and the thousands of dedicated employees who have proudly brought a no-compromise attitude to the table each and every day. Today, the world-class, highly-skilled team at the Laurent Beaudoin Completion Centre continues to carry on the tradition of delivering game-changing large-cabin aircraft in Montréal, much like the original *Global Express* 20 years ago.”

The *Global 7500* aircraft offers Bombardier’s signature smooth ride and a spaciousness that is unique among business jets. With its award-winning bespoke interior featuring a full-size kitchen and four true living spaces, the *Global 7500* aircraft offers the ultimate in-flight experience. Setting the benchmark for the most exceptional cabin interior, the *Global 7500* aircraft offers the most innovative features such as Bombardier’s patented Nuage seat, meticulously designed for maximum comfort and the revolutionary nice Touch cabin management system (CMS), a new way to connect with the *Global 7500* aircraft cabin through the Bombardier Touch dial, featuring business aviation’s first application of an OLED display.

- **A signature smooth ride, four true living spaces and the longest range in the industry, all combined to offer unmatched performance and comfort on board the *Global 7500* aircraft**
- **The *Global 7500* jet promises to revolutionize the market and significantly change the private aviation landscape**
- **Delivery of the *Global 7500* aircraft took place at Bombardier’s newly renamed Laurent Beaudoin Completion Centre, a state-of-the-art facility that perfectly combines craftsmanship with ingenuity and the latest design trends**
- **Aircraft enters service on the heels of one of the most efficient flight test validation campaigns in the industry for a clean-sheet business jet**
- **Celebration represents significant accomplishment for Bombardier and its thousands of employees who worked on the program**
