BOMBARDIER Q400 AIRCRAFT CONTINUES TO SUPPORT PORTER AIRLINES' GROWTH

News / Airlines, Manufacturer

Porter Airlines and Bombardier Commercial Aircraft announced that the airline's fleet has grown to 29 aircraft with Bombardier's delivery of another Q400 turboprop. Porter exclusively flies Q400 airliners.

Porter's home base at Billy Bishop Toronto City Airport is known as one of the world's best urban airports. It is located within three kilometers of the city's central business and entertainment districts. Approximately 2.7 million passengers used the airport in 2016.

"The Bombardier Q400 aircraft represents the fine craftsmanship that has been the backbone of the aerospace industry in Canada for many years," said Robert Deluce, President and CEO, Porter Airlines. "As Bombardier prepares to celebrate its 75th anniversary this year, the Q400 aircraft's performance, environmental credentials and passenger appeal continue representing hallmarks of our customer experience. These attributes have supported Porter's network growth to 23 destinations in more than a decade of operation."

“We are honoured that Porter continues to credit the Q400 aircraft with providing the operating efficiency, speed and low noise levels that have helped the airline grow to become one of the best regional airlines in North America. Bombardier is delighted that the Q400 aircraft has contributed to that success as we continue to see a trend for more capable turboprop aircraft worldwide,” said Fred Cromer, President, Bombardier Commercial Aircraft.
