

BREEZE AIRWAYS - NEW LIVERY REVEALED, ORDER FOR 20 ADDITIONAL A220-300 CONFIRMED

News / Airlines, Manufacturer

Breeze Airways has revealed its new A220-300 livery, while confirming that it has reached a purchase agreement with Airbus for 20 more of the aircraft. This previously undisclosed order for 20 brings Breeze's total order book to 80 A220-300s, the first of which will be delivered in Q4 2021.

The aircraft's fresh paint job was completed at Airbus' facility in Mobile, Alabama, which will deliver approximately one A220 per month to Breeze over the next six-and-a-half years. The airline plans to begin flights with the Airbus fleet in the second quarter of 2022.

The A220 superior efficiency will support the new airline's business objectives to offer a great travel experience, with low fares and high flexibility. Breeze is expected to provide nonstop service between underserved routes across the U.S. at affordable fares. Breeze started airline operations in May 2021. This first A220 is the first new aircraft that will be operated by the airline.

The A220 is the only aircraft purpose-built for the 100-150 seat market and brings together state-of-

the-art aerodynamics, advanced materials and Pratt & Whitney's latest-generation PW1500G geared turbofan engines. Benefitting from the latest technologies, the A220 is the quietest, cleanest and most eco-friendly aircraft in its category. Featuring a 50% reduced noise footprint and up to 25% lower fuel burn per seat compared to previous generation aircraft, as well as around 50% lower NOx emissions than industry standards, the A220 is a great aircraft for urban operations.

Over 170 A220s have been delivered to ten operators in Asia, North Americas, Europe, and Africa, proving the great versatility of Airbus' latest family member.
