

# CITATION LATITUDE GETS EASA CERTIFICATE

News / Business aviation, Manufacturer

**The Cessna Citation Latitude midsize business jet has received certification from EASA. This means that the aircraft can now be registered in Europe.**

Kriya Shortt, senior vice president, Sales and Marketing said: “We are thrilled to offer the Citation Latitude to our European customers. This aircraft is ideally suited for this market and can provide customers non-stop access to key destinations throughout the continent as well as North Africa and the Middle East. Customer input was a key driver in the development of the Latitude, which brings the amenities of large cabin aircraft at a midsize acquisition price and best-in-class operating costs.”

The Latitude can fly non-stop from locations throughout Europe such as London to St. John’s or Lisbon to Moscow.

The aircraft also received certification to operate into and out of La Mole Airport – a popular European vacation destination in St. Tropez, France.

La Mole requires special authorisation due to the strict aircraft performance requirements, dense terrain and heavy airport traffic at the airport.
