

CIVIL VERSION OF THE LATEST IL-76MD-90A AIRCRAFT WILL BE TESTED IN 2015

News / Manufacturer

Russian Ministry of Defense and Ilyushin Company will test the civil version of the latest Russian Il-76MD-90A military-transport aircraft, Ilyushin Company General Designer Nikolai Talikov told RIA Novosti at MAKS-2015 airshow.

“We have planned it and the Ministry of Defense agreed to test Il-76MD-90A aircraft,” the General Designer said. The tests will be carried out this year.

Il-76MD-90A is the heavy transport aircraft derived from Il-76MD jet. It is designed for transporting troopers, large vehicles and cargo, as well as airlift delivery and paradrop of troopers, vehicles and cargo. Il-76MD-90A may also take part in medevac and fire-fighting operations. Maximum payload of the jet is 52 tons. Maximum takeoff weight is 210 tons.
