

DAHER INTRODUCES THE TBM 900 VERY FAST TURBOPROP AIRCRAFT SERIES TO INDIA

News / Business aviation, Manufacturer

Daher announced the first presentation of its Daher TBM 900-series in India, introducing the very fast turboprop aircraft to the sub-continent's business aviation community. The presentation will be organized on September 20th at New Delhi business aviation Signature's terminal at Indira Gandhi International Airport in cooperation with SRK Aviacom Pvt. Ltd, which is the Indian Area Sales Representative for TBM aircraft. Based at New Delhi's Airport, Aviacom is a leading sales organization for aircraft and helicopters in the country, as well as a provider of professional flight simulators.

Nicolas Chabbert, Senior Vice President of the Daher Airplane Business Unit, said the rising interest for fast transportation in Asia is creating a market opportunity for the company's current very fast turboprop family members: the TBM 930 and TBM 910.

Aviacom CEO Capt. Sanjay Kumar added: "By introducing Daher's TBM family of very fast turboprop aircraft, we aim to offer a cost-effective corporate aircraft for Indian businesses and entrepreneurs."

Daher recently enhanced the TBM 930 and TBM 910 passenger cabins with interior restyling, and further increased the comfort with electrically-heated seats. By design, the

cabin offers multiple quick-change capabilities, including an innovative closed toilet compartment as an option.

The superior level of service for TBM aircraft is further evolving in meeting customer expectations. In addition to the continued inclusion of Daher's Total Care Program (TCP) coverage as part of the TBM "Elite package," customers of the TBM 930 and TBM 910 receive a host of new services: subscriptions to the Garmin Pilot database and Jeppesen Pilot Pak™ bundle and – in countries where available – a three-month subscription to Sirius XM weather and radio.
