

HONDA AIRCRAFT COMPANY CELEBRATES 2 DECADES OF AVIATION INNOVATION AND SHOWCASES THE FUTURE OF FLIGHT AT EAA AIRVENTURE 2026

News / Business aviation, Manufacturer

Honda Aircraft Company return to EAA AirVenture Oshkosh 2026 will celebrate the company's two decades of aviation innovation while highlighting Honda's vision for the future of mobility. As part of Honda's largest AirVenture display to date, aviation enthusiasts can experience a diverse showcase of products spanning aviation, mobility, and motorsports. Exhibits will include a HondaJet HA-420 from Honda Aircraft Company's current pre-owned aircraft inventory equipped with the [APMG S performance upgrade package](#), Honda's eVTOL 1/3-scale flight-test model, Honda and Acura heritage vehicles and a variety of Honda powersports and racing products on display throughout the week-long event from July 20-26.

Honda eVOTL model on display

For the first time in the U.S., a 1/3-scale Honda eVTOL flight-test model will be on display. Honda is conducting research and development of a hybrid eVTOL that will combine electric propulsion technology with Honda's proprietary gas turbine hybrid system, aiming to achieve a high level of range, operability, and passenger comfort.

Honda aircraft advances STEM education

As part of the company's ongoing commitment to support opportunities in STEM education, Honda Aircraft will again serve as the presenting sponsor for EAA's [GirlVenture Camp](#). The camp provides young women in grades 9-12 an opportunity to network with pilots and industry professionals while attending aviation-focused workshops and participating in flight simulation activities.

New Honda Aircraft engagement

For the first time, visitors to the Honda booth can also experience the Honda Hangar, a broadcast studio located within Honda's exhibit. Throughout the week, daily discussions will provide visitors with an inside look at Honda technologies, emerging mobility initiatives, and introduce the people helping drive innovation across the organization.
