

MINISTÈRE DES TRANSPORTS DU QUÉBEC BECAME LAUNCH CUSTOMER FOR VIKING CL-415 AUP

News / Maintenance / Trainings, Manufacturer

Viking Air Limited will take care of the Avionics Upgrade Program for eight of Ministère des Transports du Québec Canadair CL-415 aerial firefighters. The contract signed valued at US\$42.6M. With execution of the contract, MTQ becomes the launch customer for the Viking Avionics Upgrade Program for the Canadair CL-415 amphibious aircraft fleet.

The first of MTQ's eight CL-415 aircraft to be modified through the Viking AUP will become the prototype for the program and will undergo modification and upgrade activities at Viking's AUP integrator, Cascade Aerospace, in Abbotsford, British Columbia. This process will comprise the design, installation, testing and certification of the Pro Line Fusion® integrated avionics system in collaboration with Collins Aerospace as the component OEM.

After program certification, MTQ's remaining seven CL-415 aircraft will also undergo the avionics upgrade to their specific configuration at Cascade's facility.

Gregory Davis, Viking's vice president of Customer Service & Product Support commented, "We are extremely proud to collaborate with Ministère des Transports du Québec on the modernization

of their CL-415 aerial firefighter fleet. By working together with dedicated Canadair operators such as MTQ, we are securing the future of this great aircraft all over the world.”

’As an original launch customer for both the Canadair CL-215 and CL-415, the Ministère des Transports du Québec has always been actively engaged in the development of the CL platform,” said Dan Seroussi, Viking’s director of Programs. “We are excited to be working with MTQ to further enhance the Canadair CL-415 through our AUP and deliver the best evolution of the aircraft for the future.”
