

REMOS AG PARTNERS WITH SCHEME DESIGNERS FOR NEW GXIS LIVERY

News / Manufacturer

Ultra-modern, elegant and sleek – that is what the Scheme Designers team of artists set about to capture for the latest member of the REMOS AG family of aircraft, the GXiS, powered by the ROTAX 912iS Sport with electric fuel injection. The new REMOS GXiS promises to be powerful and state-of-the-art, while also being efficient, user friendly and safe. The GXiS is being shown at AERO Friedrichshafen, 20-23 April 2016.

For this special viewing, REMOS commissioned Scheme Designers to develop an eye-catching, striking and unique livery that captures the clean lines and beautiful shapes of the GXiS, and its refined cowling and overall design. REMOS Head of Sales, Jürgen Rehländer says, “Isn’t she a beauty! The Scheme Designers artists developed a stunning design that captures the energy and spirit of the GXiS.”

Scheme Designers President, Craig Barnett, says “The new GXiS is a beautiful aircraft and the REMOS team did a fantastic job with the new cowling and design. Scheme Designers has been working with the REMOS team for about 6 months to design a dramatic and exciting livery that

could be executed in vinyl flawlessly and very cost effectively.” Craig went on to say “This show aircraft really illustrates what a beautiful aircraft the GXiS is and we’re pleased to be working with REMOS in this exciting market...and there is more to come!”

The REMOS GXiS can be seen at Aero Friedrichshafen, 20-23 April 2016, at the REMOS AG booth, B3-207.
