

# RUSSIAN HELICOPTERS TO TEST MI-171A2 HELICOPTERS AT EXTREMELY LOW TEMPERATURES

News / Manufacturer

**Russian Helicopters plans to test Mi-171A2 multi-purpose helicopters in adverse weather conditions with air temperatures as low as minus 50 degrees Celsius, the company reported.**

**Two helicopters, as well as specialists of the Moscow Mil Helicopter Enterprise have already arrived in Yakutia where the helicopters' trials will be held during a month.**

**The program of trials envisages about 20 flights at air temperatures ranging from minus 45 to minus 50 degrees Celsius and icing conditions.**

**In this situation, specialists will check the helicopter's anti-icing system, its heating and some other auxiliary elements responsible for the rotorcraft's uninterrupted operation at extremely low air temperatures.**
