

TECNAM AIRCRAFT UNVEILS P2012 VIP AT AERO FRIEDRICHSHAFEN

News / Business aviation, Events / Festivals, Manufacturer

I must admit that I was already very impressed by the P2012 at the Caribavia 2025 , when I was exploring the business aircraft of Saint Barth Executive on the tarmac at Saint-Barthélemy-Rémy-de-Haenen Airport. Today at AERO 2026, Tecnam Aircraft stated - forget everything you know about piston-powered travel. Building on the global triumph of the P2012 series... And pulled back the curtain on P2012 VIP. Stating it is the ultimate executive sanctuary, offering a premier "First Class" passenger experience that rivals light jets.

Paolo Pascale Langer, CEO of Tecnam commented: "The P2012 VIP is the ultimate expression of Italian design and aeronautical engineering. We wanted to create an aircraft where the journey is just as magnificent as the destination. By combining the rugged reliability of the P2012 platform with bespoke luxury, smart technology, and unparalleled cabin space, we have crafted an environment that truly feels like the finest private club in the sky."?

Francesco Sferra, Tecnam P2012 & Special Mission Platforms Sales Manager, stated: "Step into the P2012 VIP and you immediately realize it offers a volume and comfort level simply unmatched in this aircraft category. From the Starlink-ready connectivity to the electronically dimmable

windows and the espresso machine, every single detail has been engineered to anticipate the needs of the most demanding business travelers and charter operators."

Designed entirely around the passenger's senses, the P2012 VIP leverages the largest cabin volume in its class to create a bespoke environment that adapts instantly to your mood, your business, and your leisure.

Step aboard into an exclusive six-seat haven swathed in hand-stitched, genuine leather. The heart of the cabin features a sprawling four-seat club arrangement—boasting lavish legroom, complemented by two additional forward-facing executive seats.

Functional elegance dictates every detail. Each premium chair delivers eight degrees of freedom, allowing you to recline, slide, and rotate at your leisure, supported by retractable armrests. For dining or working in flight, two large, electrically retractable tray tables can be easily deployed.

The P2012 VIP replaces traditional window shades with electronically dimmable smart panoramic windows. A simple touch instantly transforms the cabin's natural light and atmosphere.

- **Bespoke Illumination:** Tailor your environment with adjustable LED ambient lighting—shifting seamlessly from a bright workspace to a relaxing twilight, accented by individual reading spots.
- **Whisper-Quiet Journeys:** An advanced three-layer soundproofing system envelops the cabin to dramatically reduce exterior noise. Combined with LEMO headset plugs at every seat for active noise cancellation, your flight remains as peaceful and undisturbed as a private lounge.
- **Uninterrupted Connectivity:** Stay tethered to the world at altitude with Starlink-capable USB-C ports. Standard 110V/220V inverters and "home-style" power sockets ensure your devices never lose power.
- **Live Flight Tracking:** Dedicated Portable Electronic Device integration streams real-time flight telemetry directly to your fingertips.

Entertaining in the sky has never been so refined. Strategically positioned near the main entrance, the bespoke galley is a jewel of Italian furniture craftsmanship. Outfitted with a chilled compartment and a dedicated coffee station, passengers are always moments away from a

poured glass of sparkling prosecco or a freshly brewed espresso. For absolute discretion, a private aft lavatory awaits behind a sleek sliding door. This masterpiece of space efficiency is luxuriously appointed with premium materials, including supple leather and rich Alcantara.
