TECNAM AND GREEN AEROLEASE LAUNCH A DEDICATED RENTAL OFFER FOR TECNAM AIRCRAFT

News / Maintenance / Trainings, Manufacturer

Tecnam and Green Aerolease launched new rental offer specifically dedicated to Tecnam aircraft. This strategic partnership aims to support flight training organizations across Europe by providing cost-effective, flexible access to a modern fleet of Tecnam aircraft. The rental offer includes the Tecnam P2008JC, P-Mentor, P2010, and P2006T NG models aircraft that are widely recognized for their innovation, reliability, and operational efficiency.

This initiative is specifically tailored for Approved Training Organizations and Flight Training Organizations looking to renew their fleets without the burden of large upfront investments. By leveraging Tecnam's extensive support network and Green Aerolease's expertise in aircraft rental, the partnership ensures seamless access to state-of-the-art training aircraft, helping schools improve aircraft availability, reduce training costs, and enhance operational efficiency.

Green Aerolease, which has deployed more than 45 aircraft in 7 European countries over the past four years, brings its extensive experience in providing turnkey rental solutions to the collaboration.

The number of aircraft made available under this new offer will adapt to meet customer demand across the continent.

Walter Da Costa, Chief Sales Officer at Tecnam, commented: “This collaboration with Green Aerolease reflects our shared vision of making high-quality flight training accessible and sustainable. By offering a flexible rental model, we remove a major barrier for many flight schools and flying clubs, allowing them to access our latest aircraft with minimal financial risk. It’s a win-win for the future of aviation training in Europe.”

Charles Cabillic, Founder of Green Aerolease, stated: “We are very proud to launch this partnership with Tecnam, a leader in training aircraft manufacturing. Currently, the need for professional pilots is huge, and as a result, flight schools are under pressure to modernize their fleets to meet demand efficiently and sustainably. We are convinced that Tecnam aircraft perfectly address these needs, and this collaboration will make fleet renewal easier and more accessible for schools across Europe.”
