TEXTRON AVIATION TO SHOWCASE NEXT GENERATION OF MILITARY AIRCREW MULTI-ENGINE TRAINING AIRCRAF AT FARNBOROUGH INTERNATIONAL AIRSHOW2024???

News / Events / Festivals, Manufacturer

Textron Aviation will return to the Farnborough International Airshow as the industry leader with more than 1,700 Cessna and Beechcraft turbine aircraft based in Europe and more than 250,000 aircraft delivered worldwide.???Building upon the versatile and reliable Beechcraft King Air 260. Textron Aviation is today announcing that its new military multi-engine training aircraft will be on display at the FIA for the first time, marking its debut in Europe.

This state-of-the-art aircrew training aircraft was recently chosen to modernize aircrew training for the United States Navy's Multi-Engine Training System and the Future Aircrew Training (FAcT) program in Canada. Specific capabilities include factory options for TACAN, angle of attack, V/UHF radio, digital audio system, engine trend monitoring, condition-based maintenance plus, observer/jump seat, passenger mission seats and full-face oxygen masks.
