

TEXTRON DEBUTS CESSNA CITATION LONGITUDE SUPER-MIDSIZE JET

News / Business aviation, Manufacturer

Textron Aviation Inc., a Textron Inc. company, is displaying 11 of its commercial business jet and turboprop aircraft at NBAA's 2015 Business Aviation Convention and Exhibition in Las Vegas, including the public debut of the **Cessna Citation Longitude** super-midsize business jet.-----

"As evidenced by our extensive lineup at the show, no other aircraft manufacturer offers the broad range of products that we do. We are excited to expand our product offering even further with the new Citation Longitude, which will be a revolution in the super-midsize segment," said Kriya Shortt, senior vice president, Sales and Marketing. "The Citation Longitude is a perfect example of our commitment to meet our customers' mission needs through continued product investment."

Moreover, on 16th November, Textron Inc. debuted its new Cessna Citation Longitude business jet at NBAA's Business Aviation Convention and Exhibition in Las Vegas. The company also announced it plans to enter the large business jet category with the clean sheet, 4,500-nautical mile Citation Hemisphere. The Longitude and Hemisphere will join the Citation Latitude to complete a new, large-cabin, three-aircraft Citation family.

“We’re thrilled to unveil the future of this larger Citation family. The debut of the Longitude has been highly anticipated among prospective customers, industry observers and our Textron Aviation team members,” said Scott Ernest, Textron Aviation president and CEO. “Driven by customer input, the Longitude combines the ideal mix of performance, cabin comfort and industry leading technology. And, along with the Citation’s proven design and dependability, the Longitude is designed to revolutionize the super-midsize segment.”
