TRELLEBORG EXPANDS AEROSPACE CAPABILITIES IN THE APAC REGION

News / Manufacturer

Trelleborg Sealing Solutions Aerospace expands its capabilities in the APAC region to provide customers with an unsurpassed level of service. Applying Trelleborg's "local presence, global reach" principles, the enhanced presence in local markets in the region mean aerospace customers will increasingly benefit from the strength and capabilities of a global leader.

Quinn Collett, Director Trelleborg Sealing Solutions Aerospace Asia Pacific, commented: "Our goal is to be the supply partner of first choice, working globally through our local teams, and this expansion helps deliver that promise across the region. Trelleborg is the world's leading supplier of sealing solutions to the aerospace industry with a history that goes back over 60 years. The expansion means we will offer an even higher level of service to our customers and increase their local access to our established global strengths and capabilities. This enables us to professionally manage commercial and technical aspects of new and ongoing business.The enhancements allow us to act quickly and reduce customers' time-to-market with more local decision making, greater stock levels and an expanded team of experts, including engineers, project managers, quality and customer service professionals. This, along with a long heritage of aerospace expertise, will

ensure that Trelleborg offers an unsurpassed level of service in the region”

Reflecting the positive outlook for the aerospace industry in the region, the expansion includes significant increases in Trelleborg’s APAC aerospace team, including growth in its regional Customer Solution Centers, increasing warehouse capacity to mitigate supply risks, and more value-added services, such as kitting, assembly, and inspection. Trelleborg Sealing Solutions offers a local presence through its five regional Customer Solution Centers in Singapore, China, Japan, Hong Kong and India, four warehouses, two R&D facilities and three production facilities.
