

RECARO AIRCRAFT SEATING BL3710 PUTS COMFORT IN THE SPOTLIGHT ON INDIGO'S BRAND-NEW A321NEO

News / Airlines, Manufacturer

RECARO Aircraft Seating BL3710 has entered into service on IndiGo's A321neo. This seat program marked the first time that IndiGo selected RECARO as a seating solution partner since the airline's founding in 2006. Deliveries of the BL3710 will be installed on a fleet of 75 A321/A320neo aircraft. Each A321 can seat 232 passengers on the award-winning economy class seat. Outfitted in a customized trim and finish, the lightweight seat features numerous comfort features, including integrated neck support, an ergonomic backrest and generous living space. The bestselling BL3710 was unveiled in 2019, built specifically for short and medium-haul flights and has earned accolades from Red Dot Design and iF Design.

Dr. Mark Hiller, CEO of RECARO Aircraft Seating and RECARO Holding, commented: "It's great to see the BL3710 flying for the first time with IndiGo, as it will elevate the passenger experience for their travelers. This project marked the first of many collaborations with IndiGo and I look forward to supporting their mission of offering efficient service and reliable products for many years to come."

Mr. Pieter Elbers, CEO of IndiGo, said: "We are thrilled to be the first airline in the subcontinent to offer the award-winning RECARO Aircraft Seating BL3710 onboard our aircraft. The addition of these new seats to our brand-new A321neo aircraft will elevate the overall travel experience for our customers, providing them with more comfort and convenience on short and medium-haul flights. As we continue to expand our network and offer more flight options, we will remain true to our promise of courteous, hassle-free, on-time, and affordable travel experience."

The slim design, weight of less than 10kg per pax, and small number of parts reduces waste and advances the sustainable goals of both IndiGo and RECARO. Maintenance of the BL3710 is backed by the strong RECARO customer service team, which ensures support through the entire lifecycle of the seat. IndiGo customers can look forward to enjoying a comfortable and relaxing flight, with plenty of legroom and a range of features designed to enhance their overall travel experience.

In 2022, India-based IndiGo flew nearly 47 million passengers to its 100 destinations. The low-cost carrier has a fleet of nearly 300 Airbus aircraft. As IndiGo continues to grow and expand its network, the airline remains committed to delivering exceptional customer service and travel experience.
