

STARLUX ORDERS 10 MORE AIRBUS A350-1000S

News / Airlines, Events / Festivals, Manufacturer

STARLUX Airlines of Taiwan signed a firm order with Airbus for the purchase of ten additional A350-1000 aircraft. The agreement was signed at the Paris Airshow by STARLUX Airlines CEO Glenn Chai and Benoît de Saint-Exupéry, Airbus EVP Sales of the Commercial Aircraft business. STARLUX Airlines already operates an all-Airbus fleet of 28 aircraft including the A350-900, the A330neo and the A321neo. The Taiwanese airline has on order 30 aircraft including the A350F freighters and A350-1000.

Glenn Chai commented: "Expanding our international fleet with additional A350-1000s is a significant step toward reinforcing our global presence and enhancing connectivity across key markets. This aircraft offers efficiency, range and comfort, making it the perfect fit for our strategy to optimise long-haul operations while delivering an exceptional passenger experience. As we continue to strengthen our international network, the A350-1000 will play an important role in driving growth, sustainability and operational flexibility."

Benoît de Saint-Exupéry stated: “STARLUX Airlines’ decision to add more A350-1000s to its growing fleet reaffirms the aircraft’s standing as the benchmark for long-haul operations. With its advanced design and fuel-efficient performance, the [A350-1000](#) Long Range Leader enables airlines to optimise routes while reducing environmental impact. We are pleased to strengthen our long-standing partnership with STARLUX Airlines as they expand their global footprint and connect more destinations with efficiency and comfort.”

The A350 is the world’s most modern and efficient widebody aircraft and has set new standards for intercontinental travel. It offers the longest range capability of any commercial airliner in production today. Powered by the latest generation of Rolls-Royce engines, the aircraft is designed to fly up to 9,700 nautical miles / 18,000 kilometres non-stop, using 25% less fuel than previous generation types and with a similar reduction in carbon emissions.

As with all Airbus aircraft, the A350 is already able to operate with up to 50% Sustainable Aviation Fuel. Airbus is targeting to have its aircraft up to 100% SAF capable by 2030.

The [A350 Family](#) has received more than 1,390 orders from 60 customers worldwide, with more than 650 aircraft currently in the fleets of 38 operators, flying primarily on long-haul routes.
