- Bombardier business jets are ideal for the Asia-Pacific region, offering impressive range and unmatched luxury; clientele have access to world-class service centre in Singapore

Bombardier is thrilled to announce that a full-scale mock-up of its eagerly anticipated *Global 7000* aircraft will be on display in Singapore as of March 1, offering guests a rare opportunity to experience the aircraft's unmatched spaciousness and luxury first hand.

“We are extremely excited to introduce the *Global 7000* aircraft to the Asian-Pacific market in such a tangible way,” said Khader Mattar, Vice President of Sales for the Middle East, Africa, Asia Pacific & China, Bombardier Business Aircraft. **“There’s nothing like being able**

to see the exceptional interior features – like the four true living spaces and the full-size kitchen – that put this remarkable aircraft in a class of its own.”

The mock-up of the *Global 7000* aircraft features a dining area, entertainment lounge, en-suite master bedroom and private washroom. The fully equipped kitchen includes high-end appliances, with ample room for dinnerware and glassware. The interior of the aircraft is highly customizable, and owners seeking to create the ultimate in-flight experience will be able to configure the interior to reflect their personal tastes. Guests who arrange a special private viewing of the mock-up will be able to explore the full length of the cabin, from the cutting-edge cockpit to the expansive luggage bay at the rear, which was designed to be fully accessible during flight.

The *Global 7000* aircraft, the world's largest purpose-built business jet, has a top speed of Mach 0.925 and a remarkable 7,400-nautical-mile range, allowing it to connect the world's most expansive city pairings while delivering the ultimate smooth ride. From Singapore, it can travel to London or Cape Town, nonstop.*

The full-size mock-up will be on display for two weeks on Singapore's Keppel Island, starting March 1. This exclusive visit to Singapore will be the *Global 7000* mock-up's first appearance in the Asia-Pacific region, after recently visiting the Jetex Private Terminal in Dubai. The mock-up's arrival comes on the heels of Bombardier's presence at the Singapore Airshow, one of the most important aerospace and defence exhibitions in the world, where interest and anticipation around the *Global 7000* aircraft were palpable.

Bombardier business jets, with their exceptionally smooth ride, impressive range and unparalleled luxury, are ideal for private aviation clientele in the Asia-Pacific region. Bombardier also has a world-class service centre in Singapore for convenient access to maintenance, refurbishment and modifications for our customers across the region.
