

CESSNA CITATION LONGITUDE IS NOW EASA CERTIFIED

News / Business aviation, Manufacturer

Textron Aviation flagship [Cessna Citation Longitude](#) super-midsize business jet achieved certification from the European Aviation Safety Agency (EASA), clearing the way for customer deliveries to begin in the region. “In the second half of last year we saw a substantial increase in super-midsize flight activity across Europe as individuals relied on these products as a transportation solution,” said Tom Perry, vice president of Sales, EMEA, Textron Aviation. “The introduction of the Longitude to the European market will fulfill the international travel needs of many of our customers, while providing them peace of mind and convenience for both their business and personal travel.”

The largest jet in the Cessna Citation lineup, the Longitude was designed with business and return on investment at the forefront, with the lowest direct operating cost of any super-midsize jet. Capable of flying from Geneva to Dubai or Rome to New Delhi, the Longitude offers class-leading comfort, the quietest cabin in class, and advanced connectivity for those focused on staying productive in the air.

As a clean-sheet aircraft, the Longitude was designed with innovation front of mind, and a cabin experience shaped around customer input and a broad range of mission capabilities.

“The Longitude’s versatility has already enabled its utilization in multiple fields, from air ambulance to flight inspections,” added Perry. “We have one specially configured aircraft set to be delivered later this year, outfitted with flight inspection equipment to perform critical verification of navigation aids.”

The Longitude is backed by Textron Aviation’s extensive global customer service network, providing customers with direct access to nearly 3,000 expert employees, including service representatives offering maintenance, inspections, parts, repairs, avionic upgrades, equipment installations, refurbishments and other specialized services.

With a range of 6,482 kilometers (3,500 nautical miles) and full fuel payload of 726 kilograms (1,600 pounds), the Citation Longitude is designed to elevate passenger expectations in the super-midsize class by delivering the quietest cabin, a low cabin altitude (1,814 meters/5,950 feet), more standard features and a comfortable, bespoke interior. With seating for up to 12 passengers, including an optional crew jump seat, the Longitude features a stand-up, 6-foot tall flat-floor cabin. A standard double-club configuration delivers the most legroom in the super-midsize class. Fully berthable seats are designed and manufactured in-house, and a spacious walk-in baggage compartment is accessible throughout the entire flight. State-of-the-art cabin technology enables passengers to manage their environment and entertainment from any mobile device.

The clean-sheet design of the Longitude integrates the latest technology throughout the aircraft, bringing customers the lowest direct operating cost in its class. Powered by FADEC-equipped Honeywell HTF7700L turbofan engines with fully integrated autothrottles with envelope protection, the Longitude offers best in class maintenance intervals of 800 hr/18 months, Textron Aviation maintenance and diagnostic systems (AReS).

The spacious cockpit incorporates easier access and an ergonomic design that fully focuses on crew comfort and efficiency.

No super-midsize business jet offers more range, greater payload or higher cruise speed at a lower direct operating cost.
