

ELLIOTT UNVEILS BEECHJET 400A REFURBISHMENT

News / Business aviation, Events / Festivals

Elliott Aviation is introducing its newly launched **400E refurbishment** programme for the Beechjet 400A/Hawker 400XP at the show.

The refurbishment includes a Garmin G5000 avionics suite with a Lumatech LED master warning panel, Gogo WiFi with Gogo Vision (On-Demand-Movies), an innovative exterior paint design and a completely redesigned, weight-saving interior.

The interior includes a newly designed shell kit with a recessed headliner creating more headroom. The interior also has USB charging ports, redesigned cabinetry and variable colour LED upwash and downwash cabin lighting, all controlled through a mobile app. It also features a redesigned arm ledge with LED accent lighting in the drink holders, window reveals, lower sidewalls and electric window shades.

“With a sound airframe that has no life limit, available overhaul or replacement of the Pratt & Whitney JT15D engines, and now a fully updated cockpit and interior, we have a great programme to extend the useful life and useful load capacity of the 400 model aircraft. All of the upgrades can be done at a very affordable upgrade cost,” says Elliott’s president, Greg Sahr.
