

GULFSTREAM G700 EARNS BRAZILIAN TYPE CERTIFICATE

News / Business aviation, Manufacturer

Gulfstream G700 has been certified by Brazil's Agência Nacional de Aviação Civil (ANAC), clearing the way for in-country deliveries to begin. The certification coincides with Gulfstream's fourth straight appearance at the Catarina Aviation Show at São Paulo Catarina International Executive Airport in Brazil.

Mark Burns, president, Gulfstream commented: "We've seen strong interest in the G700 in Latin America, and we are excited for customers in Brazil to experience the extensive capabilities this aircraft offers. More than 50 G700 aircraft have been delivered since it entered service in April 2024 and demand continues to grow around the world as customers experience firsthand how its range, speed and cabin comfort are exceeding expectations."

The G700 features the most spacious cabin in business aviation and can be configured with up to five living areas. The aircraft also offers innovative options including the industry's only ultragalley, with over 10 feet/3 meters of counter space, or a grand suite with shower. The G700 interior provides exceptional comfort with award-winning seat designs and the Gulfstream Cabin Experience with 100% fresh air, abundant natural light and the industry's lowest cabin altitude: 2,840 ft/866 m when flying at 41,000 ft/12,497 m.

With a maximum operating speed of Mach 0.935 and a high-speed cruise of Mach 0.90, the ultralong-range G700 has more than 80 city-pair speed records to date and can connect São Paulo to Seattle at Mach 0.90.
