

HOW TO MAKE THE MOST OF A BUSINESS JET STOPOVER AT LSGG DURING EBACE 2022

News / Business aviation, Events / Festivals

During EBACE 2022, our business aviation solutions and services will enable participants to make the most of their aircraft stopover. Our Geneva Airpark team, strengthened by the addition of new experienced professionals, is waiting to welcome its customers before, during and after EBACE.

How can Geneva Airpark help make the most of a business jet stopover at Geneva Airport during EBACE 2022?

With a **secure parking space for aircraft** to book as soon as possible. The business aircraft can be accommodated within the Geneva Airpark infrastructure for very short stopovers, by the day or for longer stays.

With **PART-145 line maintenance operations during the aircraft's stopover** at Geneva Airport. These are carried out in the 10,000 sq m Geneva Airpark hangar for several manufacturers. The Geneva Airpark hangar also houses the Bombardier Line Maintenance Station. Its services are available for the Challenger and Global aircraft series and performed on-site by Bombardier certified aircraft maintenance technicians.

With new, innovative and more environmentally-friendly services:

Four ITWGSE 7400 Zero Emission eGPUs have been acquired by Geneva Airpark. These eGPUs allow users to cut costs and avoid the airport's constraints on the use of APUs (10 minutes on arrival / 30 minutes on departure).

Dry cleaning of aircraft exteriors with the SKYWASH® product range. A real time-saver, this non-abrasive formula eliminates the drying, greasing and lubricating operations required after a water-based cleaning.

We are pleased to welcome new experienced professionals to our team. Together, we will strive to provide our business aviation customers, operators, and users with high-quality, tailored and flexible services, adapted to the changing needs of the sector.

Operational at Geneva Airport since 2009, PART 145-certified Geneva Airpark offers a comprehensive range of services for business aviation. Geneva Airpark has 20,000 m2 of facilities (hangar, ramp, offices and car park), which are directly accessible from the runway near Geneva Airport's Terminal C3, dedicated to business aviation.
