

JET AVIATION EXPANDS BOMBARDIER CAPABILITIES IN VIENNA WITH RECENT EASA APPROVALS

News / Business aviation, Maintenance / Trainings

Jet Aviation Vienna recently received approvals from the European Aviation Safety Agency (EASA) to provide line maintenance to Bombardier Global 5000/6000, Global Express and Global Express XRS series aircraft; and base maintenance to the Challenger 350.

As a key destination for business aviation traffic, Jet Aviation's expanding maintenance capabilities in Vienna provide support to aircraft owners and operators of Bombardier Global and Challenger aircraft in Austria and throughout Central and Eastern Europe (CEE), particularly since the Challenger is reportedly one of Bombardier's most popular business jets worldwide.

"We are delighted to extend our service offerings to meet maintenance demand for these aircraft types," says Dennis Kohr, managing director of Jet Aviation's MRO and FBO facility Vienna. "These approvals serve upwards of 100 aircraft in the region and we look forward to welcoming them to our facility in Vienna."
