

JETEX EXPANDS GLOBAL NETWORK TO ABIDJAN

News / Airports / Routes, Business aviation, Events / Festivals

Jetex announces it has signed a Memorandum of Understanding (MOU) with AERIA airport management company to be the exclusive FBO operator and manager of the newly built FBO in Abidjan, the economic capital of Côte d'Ivoire. Jetex made the announcement during the 2018 European Business Aviation Convention and Exhibition (EBACE) in Geneva, Switzerland.

For the current FBO—at the Félix-Houphouët-Boigny International Airport—the handover is scheduled for July of this year.

“We are happy to appoint Jetex as sole and exclusive FBO operator in Abidjan,” said Mr. Gilles Darriau, CEO of AERIA. “Jetex has high standards for FBOs, which is exactly what we were looking for.”

“We chose Abidjan because it is an economic powerhouse for West Africa. It’s a very urbanized and industrial city,” said Jetex President (Europe) Salem Youssef. “We’re excited to offer VIP service and become the first to do so in the region. We’re looking forward to welcoming passengers at our new FBO very soon.”

This adds to the Jetex portfolio with our first FBO in West Africa and second location in the region after Morocco. This 1,000 m² location is expected to open by July 2018 with full VIP

services.

A full spectrum of flight support, ground transfer, and bespoke concierge services will also be available via Jetex's operations centers in Dubai, Miami, and Beijing.

AERIA (International Airport of Abidjan) is part of the wider EGIS airports network, which includes 17 airports across 8 countries.

About EGIS

EGIS is an international group offering engineering, project structuring and operations services. In engineering and consulting, its sectors of activity include transport, cities, buildings, industry, water, environment and energy. In roads and airports, its offer is enlarged to encompass project structuring, equity investment, turnkey facilities delivery, operations and new mobility services. EGIS is also an airport operator and developer with 17 airports on 4 continents in 8 countries. They process an average 28 million passengers and 325,000 tonnes of freight in 2017.
