

LESS THAN 4 HOURS TO FLY FROM LOS ANGELES TO NEW YORK

News / Business aviation, Manufacturer

Once again, one more Key Speed Record, this time between Los Angeles and New York! Bombardier Global 7500 jet proved again an amazing performance!

The award-winning, clean-sheet-design *Global 7500* business jet left Van Nuys Airport at 7:01 AM local time on March 24, 2019, and arrived at Teterboro Airport at 1:55 PM local time, completing the coast-to-coast mission in 3 hours and 54 minutes, beating the

previously held record established by a competing aircraft manufacturer and making it the fastest business jet ever to complete this route **. During the flight, the aircraft reached a top speed of M 0.925 and sustained that speed for more than two hours, demonstrating exceptional speed capabilities, all while providing the smoothest ride.

“The *Global 7500* aircraft is simply the best business jet on the market today,” said David Coleal, President, Bombardier Business Aircraft. “The latest speed record demonstrates once again that the *Global 7500* jet is the undisputed leader in business aviation.”

Since its entry-into-service, the *Global 7500* business jet has proven itself to be the highest-performing aircraft in the industry. With unmatched speed and range capabilities as well as a record-setting 8,152-nautical-mile flight under its belt, the longest flight in business aviation, the *Global 7500* aircraft continues to blaze the trail in this new market segment, setting the bar for unprecedented excellence and performance in the world of business aviation.

The *Global 7500* aircraft offers the ultimate in-flight experience. Setting the benchmark for the most exceptional cabin interior, the aircraft offers the most innovative features: Bombardier’s patented *Nuage* seat, meticulously designed for maximum comfort, and the revolutionary **nice** Touch cabin management system (CMS), a new way to connect with the *Global 7500* aircraft cabin through the Bombardier Touch dial, featuring business aviation’s first application of an OLED display.
