

REDEFINING THE LUXURY TRAVEL EXPERIENCE: AERION SUPERSONIC & JETEX STRATEGIC PARTNERSHIP

News / Business aviation, Manufacturer

How do you imagine luxury travel experience in the near future? What will be different comparing to today's options? The speed of air travel maybe? Did you ever think the supersonic travel will be back again? Here are some exceptional news! Aerion Supersonic and Jetex have signed a strategic partnership which aligns the two companies in delivering a seamless ultra-luxury travel experience to their customers.?

Aerion CEO, Tom Vice said: "At Aerion we desire to bring humanity closer by reducing the time and inconvenience experienced in today's transportation networks. We also believe air travel must be an exciting, enjoyable, efficient and luxurious experience once again. For our supersonic business jet customers, we aim to craft a truly memorable, ultra-luxury travel experience that fully integrates with our customers' needs and lifestyles. The ultimate luxury is time and this partnership is a key step to help us realize our vision, allowing us to give even more time back to our customers. As an internationally recognized leader in the executive aviation industry with a network of locations at leading travel hubs around the world, Jetex are expertly positioned to ensure we collectively deliver an all-encompassing supersonic experience."

Adel Mardini, Founder & CEO of Jetex, commented: "Since the retirement of the Concorde

in 2003, the world has been eagerly waiting to return to the supersonic skies. Two decades later, we look forward to welcoming first passengers traveling aboard AS2 at Jetex private jet terminals around the world. To celebrate this special occasion, we will unveil a brand-new suite of services tailored specially for the launch of AS2. After all, this will be a class beyond the traditional private jet travel, and we look forward to working closely with Aerion to ensure a truly exceptional experience at all our international locations”.

A multi-award-winning leader in executive aviation, Jetex delivers best-in-class flight support solutions across the world. It operates its own extensive international network of more than 35 private terminals, as well as offers aircraft fueling, ground handling, global trip planning and concierge services. The company caters to both owners and operators of business jets for corporate, commercial and personal air travel. By 2025, Jetex aims to operate more than 50 private jet terminals. As a preferred partner, Jetex will collaborate with Aerion to provide personalized travel arrangements for Aerion’s AS2 business jet customers at its private terminals. The partnership will ensure that the passengers traveling around the world at supersonic speeds in the air also enjoy a seamless and most comfortable experience on the ground.

Aerion’s pursuit of faster point-to-point travel begins with the launch of the AS2 supersonic business jet which will take flight in 2025. Designed to be inherently environmentally responsible from first flight, the AS2 is the first supersonic aircraft designed with the ability to accept 100% synthetic fuel and reach supersonic speeds without the need for an afterburner. To be produced in carbon neutral operations using renewable energy, the AS2 will incorporate sustainable materials wherever feasible and be backed by an end-of-life process so that when it comes, decades from now, to retire the aircraft from service any impact on the environment is negated.

The manufacture of 300 examples of the AS2 is planned for the first decade of production with an order backlog of approximately \$3 billion already secured. The AS2 will be the first aircraft to be assembled at the company’s new global headquarters in Melbourne, Florida - Aerion Park. The state-of-the-art development – powered by clean energy - will incorporate headquarters operations plus an integrated campus for research, design, build, and maintenance of the company’s supersonic aircraft.
