

SINO JET EXPANDS ITS FLEET WITH GULFSTREAM G700

News / Business aviation

Sino Jet added another brand-new Gulfstream G700 ultra-long-range flagship business jet to its fleet, marking a further expansion of the company's fleet and an enhancement of its operational capabilities. The addition also reflects the continued trust of business aviation clients in Sino Jet's international management system. Sino Jet currently has a fleet of nearly 50 aircraft, with large-cabin business jets accounting for more than 95% of its fleet, ranking No.1 in the Asia-Pacific region for several consecutive years.

The Gulfstream G700 is one of the longest-range business jets in the world, offering a maximum range of 7,750 nautical miles (approximately 14,353 km). It enables nonstop transcontinental flights from Beijing and Shanghai to destinations such as New York and London. The aircraft features five living areas, a full-size master suite with a walk-in shower, 20 panoramic windows, a circadian lighting system, and advanced air circulation technology. Its ultra-long range and spacious, comfortable cabin configuration make the G700 an ideal platform for transoceanic travel.

As demand for flagship business jets continues to grow among high-net-worth individuals worldwide, clients are placing higher expectations on the operational standards, safety standards,

and aircraft asset management capabilities of business aviation companies. Building on its core operational system, Sino Jet provides full-lifecycle management services for business jets:

Safe operations

Sino Jet is one of the few business aviation operators worldwide to have achieved IS-BAO Stage 3, the highest level of international business aviation safety certification. The company has also established a standardized safety management system covering flight operations and maintenance, crew management, and risk assessment.

Global compliance

Sino Jet holds operational and maintenance qualifications for aircraft registered in China, the United States, Europe, as well as offshore jurisdictions including the Cayman Islands, Bermuda, Aruba, the Isle of Man, Guernsey, and San Marino. This enables the company to meet the compliance requirements of business jets registered in different jurisdictions.

Global service network

With operating bases spanning more than 20 cities across China, Southeast Asia, the Middle East, Europe, and North America, Sino Jet provides services across more than 200 countries and regions worldwide, delivering localized support and rapid response capabilities.

Digital management

Through the "Digital Sino Jet" Operations Center, Sino Jet provides digital system management throughout the full lifecycle of aircraft assets, continuously enhancing operational efficiency and supporting aircraft asset preservation.

Integrated services

Sino Jet integrates its in-house ground support and high-end travel services, with dedicated teams providing one-stop, end-to-end support. As a leading business aviation group in the Asia-Pacific region, Sino Jet's business covers business jet transactions, aircraft management, charter services, maintenance, ground support, and high-end travel services. Looking ahead, Sino Jet will leverage its continuously expanding global operating network and digital management platform to provide clients with end-to-end solutions covering the full lifecycle of aircraft asset management and global business jet travel.
