

STARLING AEROSPACE INTERIORS TAKES ITS NEW INNOVATION TO EBACE 2016

News / Business aviation, Events / Festivals

Starling Aerospace Interiors (booth C058) is showcasing its Berthable Divan at The 2016 European Business Aviation Convention & Exhibition (EBACE2016). This new innovation provides a 91 inch long modular sleeping solution and is certified for 9G and 16G aircraft.

The stylish new Berthable Divan is available as a single (club 2 configuration), three or four seater and manually converts with a single smooth motion into a flat bed. The divan is constructed from an aluminium frame making it durable yet lightweight. It can be styled and upholstered to suit a variety of interiors and has optional extras including stowage doors, drawers and plug-in arm.

Starling Aerospace Interiors will also be displaying their trolley solution and lightweight Hilo Table. The Hilo Table can be manually adjusted to three height points so it can be conveniently stowed away under the Berthable Divan. This versatile table solution can be custom built and finished with veneer, dip film, paint or leather to create a unique stylish table top. Optional chrome, gold-plated

or leather covered beauty rings are available.
