

TEXTRON AVIATION DELIVERS FIRST CESSNA CITATION LONGITUDE REGISTERED IN MEXICO

News / Business aviation, Manufacturer

Textron Aviation has delivered the first Cessna Citation Longitude business jet registered in Mexico to a customer who plans to utilize the aircraft for business travel throughout Mexico and North America. The Longitude received certification from the Mexican Federal Civil Aviation Agency in 2022.

Lannie O'Bannion, senior vice president of Global Sales and Flight Operations, commented: "The Citation Longitude's performance, efficiency and unrivaled cabin experience make it the perfect aircraft for passengers and pilots alike, and we are pleased to deliver this for our customers in Mexico. We're grateful for the owners and operators who continue to choose Citation business jets for their business and personal travel, and to the extraordinary Textron Aviation workforce that designs, builds and maintains our legendary lineup of aircraft."

The Citation Longitude incorporates the latest technologies throughout the aircraft like integrated autopilot, autothrottles, and emergency descent mode (EDM). The aircraft is equally designed around the pilot experience, passenger comfort and overall performance, delivering an aircraft that lives up to its designation as the flagship of the Citation family of business jets. No other super-

midsize business jet offers more range, greater payload or higher cruise speed at a lower direct operating cost. Longitude owners and operators in Mexico can appreciate city pairs such as Monterrey, Mexico to Asuncion, Paraguay; Toluca, Mexico to Belem, Brazil; and with only one stop, Cabo San Lucas, Mexico to Tokyo, Japan.

With a range of 6,482 kilometers (3,500 nautical miles) and full fuel payload of 726 kilograms (1,600 pounds), the Citation Longitude is designed to elevate passenger expectations in the super-midsize class by delivering the quietest cabin, a low cabin altitude (1,509 meters / 4,950 feet) more standard features and a comfortable, bespoke interior. With seating for up to 12 passengers, including an optional crew jump seat, the Longitude features a stand-up, 6-foot tall flat-floor cabin. A standard double-club configuration delivers the most legroom in the super-midsize class. Fully berthable seats are designed and manufactured in-house, and a spacious walk-in baggage compartment is accessible throughout the flight. State-of-the-art cabin technology enables passengers to manage their environment and entertainment from a mobile device. The spacious cockpit incorporates easier access and an ergonomic design that fully focuses on crew comfort and efficiency.
