

BREITLING LAUNCHES THE ALL NEW CHRONOLINER BLACKSTEEL WATCH

News / Events / Festivals

Breitling, the Swiss watchmaker that specialises in creating aviation chronographs, has unveiled a new model in the Middle East.

The Chronoliner Blacksteel features a brand new, all black livery, with a chronograph that measures flight times, and a three time zone display, making it an ideal model for dedicated business travellers and pilots alike.

The watch, encased in black steel, with a ceramic bezel, takes its inspiration from vintage Breitling timepieces from the 1950s, while the back of the watch is engraved with a depiction of a plane.

Chronoliner Blacksteel watch is now available now from [Breitling](#).
