CUTTING-EDGE AVIATION TECHNOLOGY TO BE FEATURED AT EAA AIRVENTURE OSHKOSH 2026

News / Events / Festivals

The future of aviation technology will be highlighted on July 21 as EAA AirVenture Oshkosh continues its annual tradition of featuring the latest innovations as part of displays on Boeing Plaza and demonstrations during the Tuesday air show. The 73rd annual Experimental Aircraft Association fly-in convention is July 20-26 at Wittman Regional Airport in Oshkosh.

Rick Larsen, EAA's vice president of communities and member programs, who coordinates AirVenture features and attractions commented: "EAA AirVenture Oshkosh is the focal point of the calendar for the aviation community every year, making it the perfect opportunity for companies to showcase what is on the horizon. The collection of innovations taking the stage on Tuesday represent just part of where aviation is heading."

Boeing Plaza will be packed with aircraft to celebrate the theme. Currently planned innovation displays for July 21 include BETA Technologies, Bye Aerospace, Jetson, American Drone, MagniX, Zipline, Embry-Riddle Aeronautical University, Airhart Aeronautics, Merlin Labs, Amazon Delivery, and Starlight Productions

In addition to the displays on Boeing Plaza, Bye Aerospace, Jetson, BETA Technologies, American Drone, and ScaleWings will fly during the afternoon air show. Drone delivery company Wing will display the latest developments in its operations at Twilight Flight Fest.

The July 21 air show lineup is subject to change without notice. A full lineup for the show, along with the rest of the week, is available on the Air Show page of the AirVenture website.
