

THALES AT THE DUBAI AIRSHOW 2019

News / Events / Festivals, Manufacturer

Thales has a unique value proposition in civil and defense that will bring to the space and aerospace industry with a strong focus on AI and region readiness to accommodate latest technology. With the Dubai being at the heart of innovation and digitisation. In line with the acceleration of the Group's digital transformation, digital technologies are at the heart of numerous solutions presented by Thales at this year's Dubai Air Show. Thales will be showcasing its latest aerospace innovations to over 80,000 visitors from 63 countries. The 2019 show will focus on "connecting the aerospace industry" with 80% of the world's population located within eight hours of one of the UAE's airports this is where the industry comes to make connections.

Defence

In a world that is increasingly fast moving, unpredictable and full of opportunities, our Defence customers are very demanding. Since their decisions impact people's daily lives and security, Thales's ultimate goal is to help them think smarter and act faster in a collaborative environment, throughout the critical decision chain. Combining a unique diversity of expertise with a mastery of digital technology (IA, Big data, connectivity, cybersecurity), our architects design and deliver extraordinary high tech solutions.

Aerospace

We are on the cusp of the biggest ever change in how humanity uses the skies. To face up to the

growth in traffic, as well as the desire for mobility and fast, seamless travel, Thales designs solutions to anticipate tomorrow's needs and offer our customers further opportunities to optimise the passenger experience and create sustainable value.

Space

Thales's space solutions enable us to understand and respond to global societal challenges that are crucial to humanity, such as connectivity and Internet access, a better understanding of climate change, the effectiveness of armed forces and the exploration of the universe to understand the origins of life. We believe that space is humankind's new horizon, which will enable us to build a better , more sustainable life on earth.
