

UAS FUELEVOLUTION™ LAUNCHES AT NBAA-BACE 2017

News / Business aviation, Events / Festivals

High Interest Anticipated for the Industry's Latest Fuel Management Technology

UAS International Trip Support (UAS) launches its latest technology, UAS FuelEvolution at NBAA-BACE in Las Vegas today. As the industry's newest all-in-one fuel management solution, UAS FuelEvolution is designed to simplify fuel management and ordering for both private and commercial operators. This powerful technology tool – the latest addition to the UAS Evolution™ suite – is set to revolutionize how operators manage their fuel needs and deliver cost-savings.

UAS FuelEvolution is an online fuel management platform that increases efficiency in fuel processes by providing aviation fuel costs, taxes, and supplier data around the globe. As both a web and mobile-based application, it is designed to respond to specific requirements and budgets by utilizing aggregator power and providing the latest data on jet

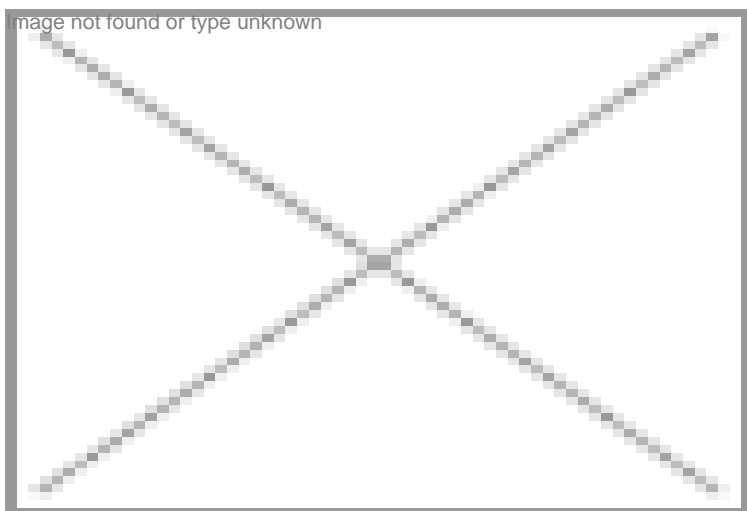

fuel prices, taxes, and into-plane fees. Its user-friendly layout allows customers to shop and release fuel in a matter of seconds, with complete confidence in information and pricing.

The powerful features of UAS FuelEvolution include complete self-service capabilities, a transparent pricing policy, forecast and budget functions, order history and cost records, and a variety of user administration capabilities. Users can also rely on 24/7 support from UAS' global team.

“UAS FuelEvolution is an incredibly user-friendly tool that makes fuel management fast and straightforward. We're incredibly proud of it and confident it will become one of the most commonly used fuel management systems on the market,” said Mr. Jay Ammar Husary, UAS Executive Vice President.

UAS Evolution is a groundbreaking suite of aviation solutions designed specifically to overcome the challenges faced by business aviation. It aims to provide the most customized and responsive solutions to clients' unique requirements, no matter how complex.

Join the UAS team at NBAA-BACE Booth C11912 to check out the capabilities of UAS FuelEvolution, UAS FlightEvolution, UAS LinkEvolution, and UAS TMSEvolution, or visit uas.aero/evolution
