

25TH ANNIVERSARY - FREE AIRCRAFT LIVERY DESIGN WORKSHOPS TO BE HELD BY SCHEME DESIGNERS EXPERTS

News / Events / Festivals, Maintenance / Trainings

Coming soon to Sun 'n Fun, Lakeland, Fla. Scheme Designers is celebrating their 25th anniversary throughout 2022. The company began with one designer working with a few aircraft manufacturers and customers, to bring custom paint schemes to all general aviation aircraft – a new concept in 1997. Since then, the company has expanded to include a team of professional aircraft livery artists who have designed aircraft schemes which are flying on over 14,000 aircraft on every continent across the globe. All visitors to Sun 'n Fun are invited to meet the Scheme Designers team in Hangar A, at booth 017.

The company works with each customer through interactive web-based tools, allowing the customer to bring their unique vision and personality to their aircraft. The Company's artists will work with customers through as many iterations as it takes to get the design and color combination perfect. The Company will also work with customers real time when necessary to tweak elements of their custom design until it beautifully achieves their vision.

Some Scheme Designers customers also want or need more than a profile and a planview drawing. For these customers, Scheme Designers also offers the unique ability to provide a photo-realistic, 3D digital rendering of their aircraft with their custom livery.

Paint shops insist on Scheme Designers also. Once the design is completed, Scheme Designers will prepare detailed dimensions drawings, to 1/8" or 1mm, along with comprehensive written specifications for the customer's chosen paint shop. These detailed schematics provide a paint shop with everything they need to accurately apply the paint or vinyl scheme to the customer's aircraft with precision and efficiency.

Free Workshops by Craig Barnett at Sun 'n Fun 2022

Scheme Designers Owner and Chief Designer, Craig Barnett, will host three free workshops at AirVenture 2021. In his interactive sessions, he will share critical guidelines and best design practices for a variety of makes and models of aircraft, for owners and companies to use when designing their new aircraft livery and in considering the repainting of their aircraft. Mr. Barnett's world-renowned workshop is presented in a dynamic, engaging, educational and entertaining, graphic-rich and visually stimulating media.

The interactive workshops include use of hundreds of photos and design renderings illustrating best practices for aircraft paint scheme design. The workshop will assist customers in navigating the process to develop their paint scheme and see it through to reality, including criteria to choosing the right paint shop for you.

“Designing the Perfect Paint Scheme”

Wednesday, April 6, 9:00-9:55am, Forum CFAA-02

Friday, April 8, 9:00-9:55am, Forum CFAA-02

“Considerations in Aircraft Painting & Vinyl”:

Thursday, April 7, 9:00-9:55am, Forum CFAA-02

The workshops are well known as educational, unique and entertaining sessions. Attendees will never look at aircraft paint schemes, or paint shops, the same way again, and will come away well equipped to develop designs for their own aircraft, and to make decisions about their paint project.

31 MARCH 2022
