ALSIM EXPANDS ITS PRESENCE IN OCEANIA WITH THE INSTALLATION OF THE AIRLINER AT SYDNEY FLIGHT COLLEGE

News / Maintenance / Trainings

ALSIM has marked an important new step in its Australian growth with the installation of its Airliner simulator at Sydney Flight College (SFC). This deployment strengthens the company's role in delivering advanced, airline?focused pilot training and further reinforces its long?term commitment to elevating aviation training standards across the Oceania region.

The Airliner is an FNPT II MCC–certified hybrid simulator that combines fly-by-wire and conventional flight controls, offering the ideal platform for APS MCC and MPL Phase II advanced training. Purpose-built around APS MCC learning objectives, it develops key airline competencies such as automation management, crew coordination, leadership, and threat and error management. Its generic airliner design provides greater flexibility and broader skill transfer,

ensuring trainees are confidently prepared for airline pilot operations and able to transition smoothly into any type rating, regardless of aircraft type.

Joseph Pilo, CEO at SFC commented: *"*Today marks an important milestone for SFC Sydney Flight College, and for our academy here in Tamworth. The introduction of the Airliner simulator represents the final piece in delivering our complete airline pilot training pathway. Advanced simulation is now a critical part of preparing pilots for this environment.The Airliner allows our students to train in a realistic airline flight deck environment, developing the communication, teamwork and decision-making skills required in modern commercial aviation. Importantly, this investment also reinforces our commitment to regional New South Wales and to Tamworth as a growing centre for aviation training. At SFC, our focus is to prepare the next generation of professional pilots with the skills, mindset and operational experience required to succeed in modern airline operations. And this simulator is an important step in delivering that vision".

Jean-Paul Monnin, President of ALSIM and Co-founder stated: "We are very proud to support SFC Australia in their mission to build world-class aviation training in Tamworth. Under the leadership of Steven Kastanias, President, and Joseph Pilo, CEO, SFC is establishing itself as a key player in the development of aviation in Australia. Their decision to invest in an ALSIM Airliner simulator reflects their ambitious vision and commitment to providing students with innovative training solutions aligned with international standards. We thank them for their trust and are honored to contribute to this major milestone for aviation training in Australia."

Sydney Flight College began in 1969 when a small group of local aviation enthusiasts gathered to discuss the idea of starting a flying club. Their dream was to create a community that would promote and support aviation, providing a space for like-minded people to come together and share their passion for flying. Over the years, SFC's club has grown in size and reputation, becoming the largest aviation club on the eastern seaboard. Today, SFC is a well-respected flight training organization that is shaping the next generation of pilots in Sydney and Tamworth. We are passionate about providing the best possible aviation experience for our members and students,

empowering them to achieve their aviation goals through state-of-the-art aircraft, world class facilities, and skilled instructors. With over 50 years of experience behind us, SFC is committed to providing a safe, supportive, and inspiring environment for all aviation enthusiasts, both now and in the future.
