

AN EXTENDED E-JET COMPONENT SUPPORT CONTRACT BETWEEN AUSTRIAN AIRLINES AND SPAIRLINERS

News / Maintenance / Trainings

Spairliners, an independent component aftermarket service provider specialized in E-Jet aircraft family, and Austrian Airlines sign a flight hour agreement to extend the component support for Austrian Airline's E-Jet fleet.

Austrian Airlines and Spairliners have signed a long-term flight hour agreement to extend their business relationship for the component support of Austrian Airline's E-Jet fleet. Austria's leading airline currently operates 17 Embraer E195 aircraft. The contract includes access to Spairliners' comprehensive component pool, repair services via their extensive maintenance network across the globe, logistics, as well as a dedicated on-site stock at Austrian Airline's home base at Vienna Airport.

"We are very pleased to be selected by Austrian Airlines as their preferred partner for component support of their E-Jet fleet. At Spairliners, we provide our customers with reliable, future-oriented solutions that are fully customized to their requirements at very competitive terms. The renewal of our contract proves that our commitment to provide the best possible support to Austrian Airlines during the pandemic, with scalable solutions to suit their needs, further strengthened our long-standing, successful relationship", says Taco Stouten, Head of Sales and Marketing at Spairliners.

"Spairliners has proven to be a very reliable and competent partner to us, and we therefore continue to put our trust in them to provide full component support for our E-Jet fleet. We appreciate the flexible solutions and high level of collaboration they offered during the pandemic and look forward to working together with Spairliners in the future", says Wolfgang Dielacher, Head of Strategic Procurement Technics at Austrian Airlines.
